

Program to show Multiple Images

```
from tkinter import *

root = Tk()

canvas = Canvas(root, width = 1000, height = 800)

canvas.pack(expand=YES)

img = PhotoImage(file = "flowers.gif")
img1 = PhotoImage(file = "map.gif")
img2=PhotoImage(file = "animals.png")
img3 = PhotoImage(file = "shapes.gif")
img4= PhotoImage(file = "trans.gif")
img5 = PhotoImage(file = "body.gif")

Label(image=img, width=298, height=298).place(x=10, y=10)
Label(image=img1, width=298, height=298).place(x=320, y=10)
Label(image=img2, width=298, height=298).place(x=650, y=10)

Label(image=img3, width=298, height=298).place(x=10, y=350)
Label(image=img4, width=298, height=298).place(x=320, y=350)
Label(image=img5, width=298, height=298).place(x=650, y=350)

mainloop()
```
