

Programs Based on Array

1. Write a Python program to convert an array to an ordinary list with the same items
2. Write a Python program to find sum of elements in an array
3. Write a Python program to find largest element in an array
4. Write a Python program to Split the array and add the first part to the end
5. Write a Python program for Find remainder of array multiplication divided by n
6. Write a Python program to remove the first occurrence of a specified element from an array.
7. Write a Python program to Reconstruct the array by replacing $arr[i]$ with $(arr[i-1]+1) \% M$
8. Write a Python program to create an array of 5 integers and display the array items. Access individual element through indexes.
9. Write a Python program to append a new item to the end of the array
10. Write a Python program to reverse the order of the items in the array.

11. Write a Python program to get the number of occurrences of a specified element in an array.
12. Write a Python program to append items from iterable to the end of the array.
13. Write a Python program to append items from a specified list.
14. Write a Python program to insert a new item before the second element in an existing array.
15. Write a Python program to remove a specified item using the index from an array.
